Hi Ravindra Rathour,

As discussed, Kindly check below for PayPal Express Checkout REST API reference.

Step 1: Please refer the steps to create sandbox account:

1. Login to developer.paypal.com with your LIVE account
2. Click Dashboard
3. Click sandbox accounts
4. Click Create account button on the top right corner
5. Create a business account for seller and a personal account for buyer
6. Please add bank account and credit card and also populate some amount to your account

Step 2: Please refer the steps below for creating APP to get Client ID and Secret Key:

1. Log in to <https://developer.paypal.com> and click Dashboard tab.
2. Click My Apps & Credentials -> On the My Apps & Credentials page -> REST API apps, click Create App.
3. On the Create New App page, provide an app name.
4. Click Create App, and then review the information displayed about your app

Switch between Sandbox and Live as show in the below image to get Sandbox or

Live Client ID, Secret key details,

Step 3: Server Side REST API reference :

Step 1 - Create order - https://developer.paypal.com/docs/api/orders/v2/#orders_create

Step 2 - Create authorization - https://developer.paypal.com/docs/api/orders/v2/#orders_authorize

Kindly check the attached text file to send additional parameter in the create order call.

Step 3 – Redirect the user to the approval url for making payments.

Step 4 - Capture Payment - https://developer.paypal.com/docs/api/orders/v2/#orders_capture

Postman collection url : <https://www.getpostman.com/collections/e1aceb0343a8e0944712>

Step 4: PayPal Integration Best Practices

Placing PayPal logos in your website Place PayPal logo in your website header and/or footer area. You can find PayPal logos at Logo Center page <https://www.paypal.com/in/webapps/mpp/logo-center>

Handling insufficient funds error If the buyer's selected funding source fails with an instrument declined error and lets the buyer choose another funding source instantly. see

<https://developer.paypal.com/docs/limited-release/checkout/v2/best-practices/#handle-insufficient-funds-error>

Please read all best practices in detail at the URL <https://developer.paypal.com/docs/limited-release/checkout/v2/best-practices/#customer-checkout-experience-and-flow>

Regards
